

## Sustainable Language Data Sharing to Support Language Equality in Multilingual Europe

### 1. Context: Public Online Services and the PSI Directive

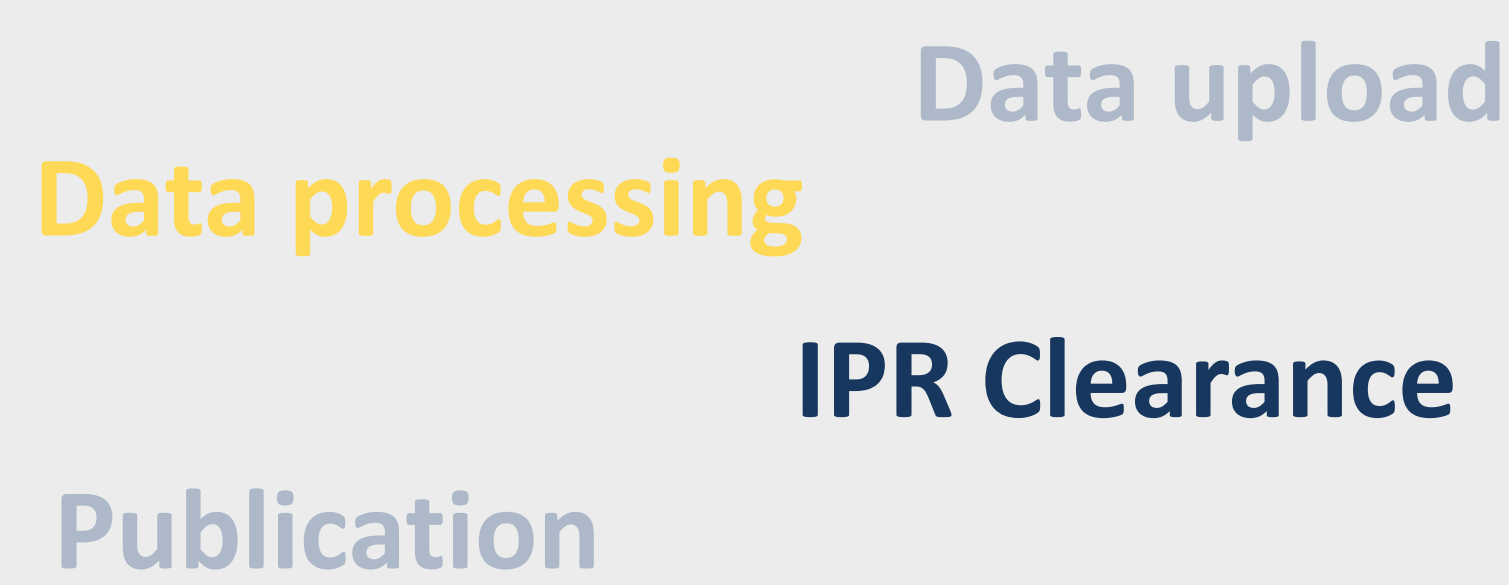

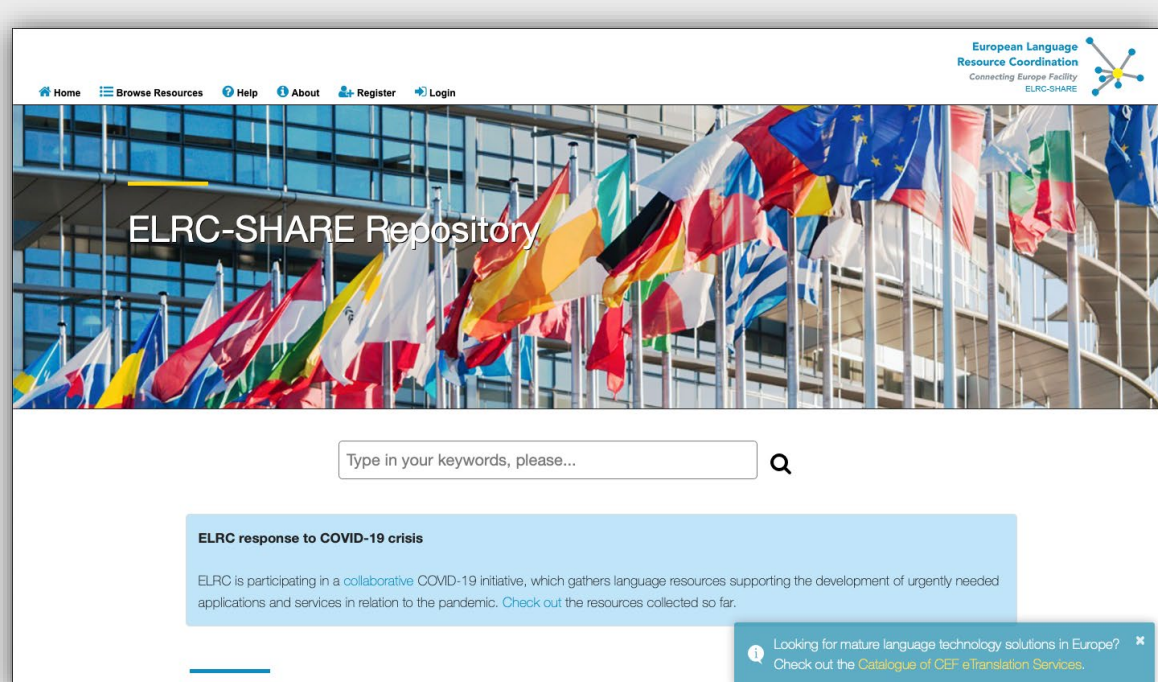

CEF Digital Service Infrastructure (DSI)	Domain
Online Dispute Resolution (ODR)	Consumer rights
Electronic Exchange of Social Security Information (EESSI)	Social security, insurance
eProcurement	Public procurement
European eJustice Portal (eJustice)	Justice, law
eHealth	Health, medicine
Business Registers Interconnection System (BRIS)	Business, market
Safer Internet	ICT
Cybersecurity	ICT
Public Open Data	Multiple domains
Europeana	Culture
Digital Skills and Jobs	Education, Training
Smart Cities	Smart Europe
EU Student eCard	Electronic exchange of student data, electronic identification

#### Public Sector Information (PSI) Directive 2003/98/EC

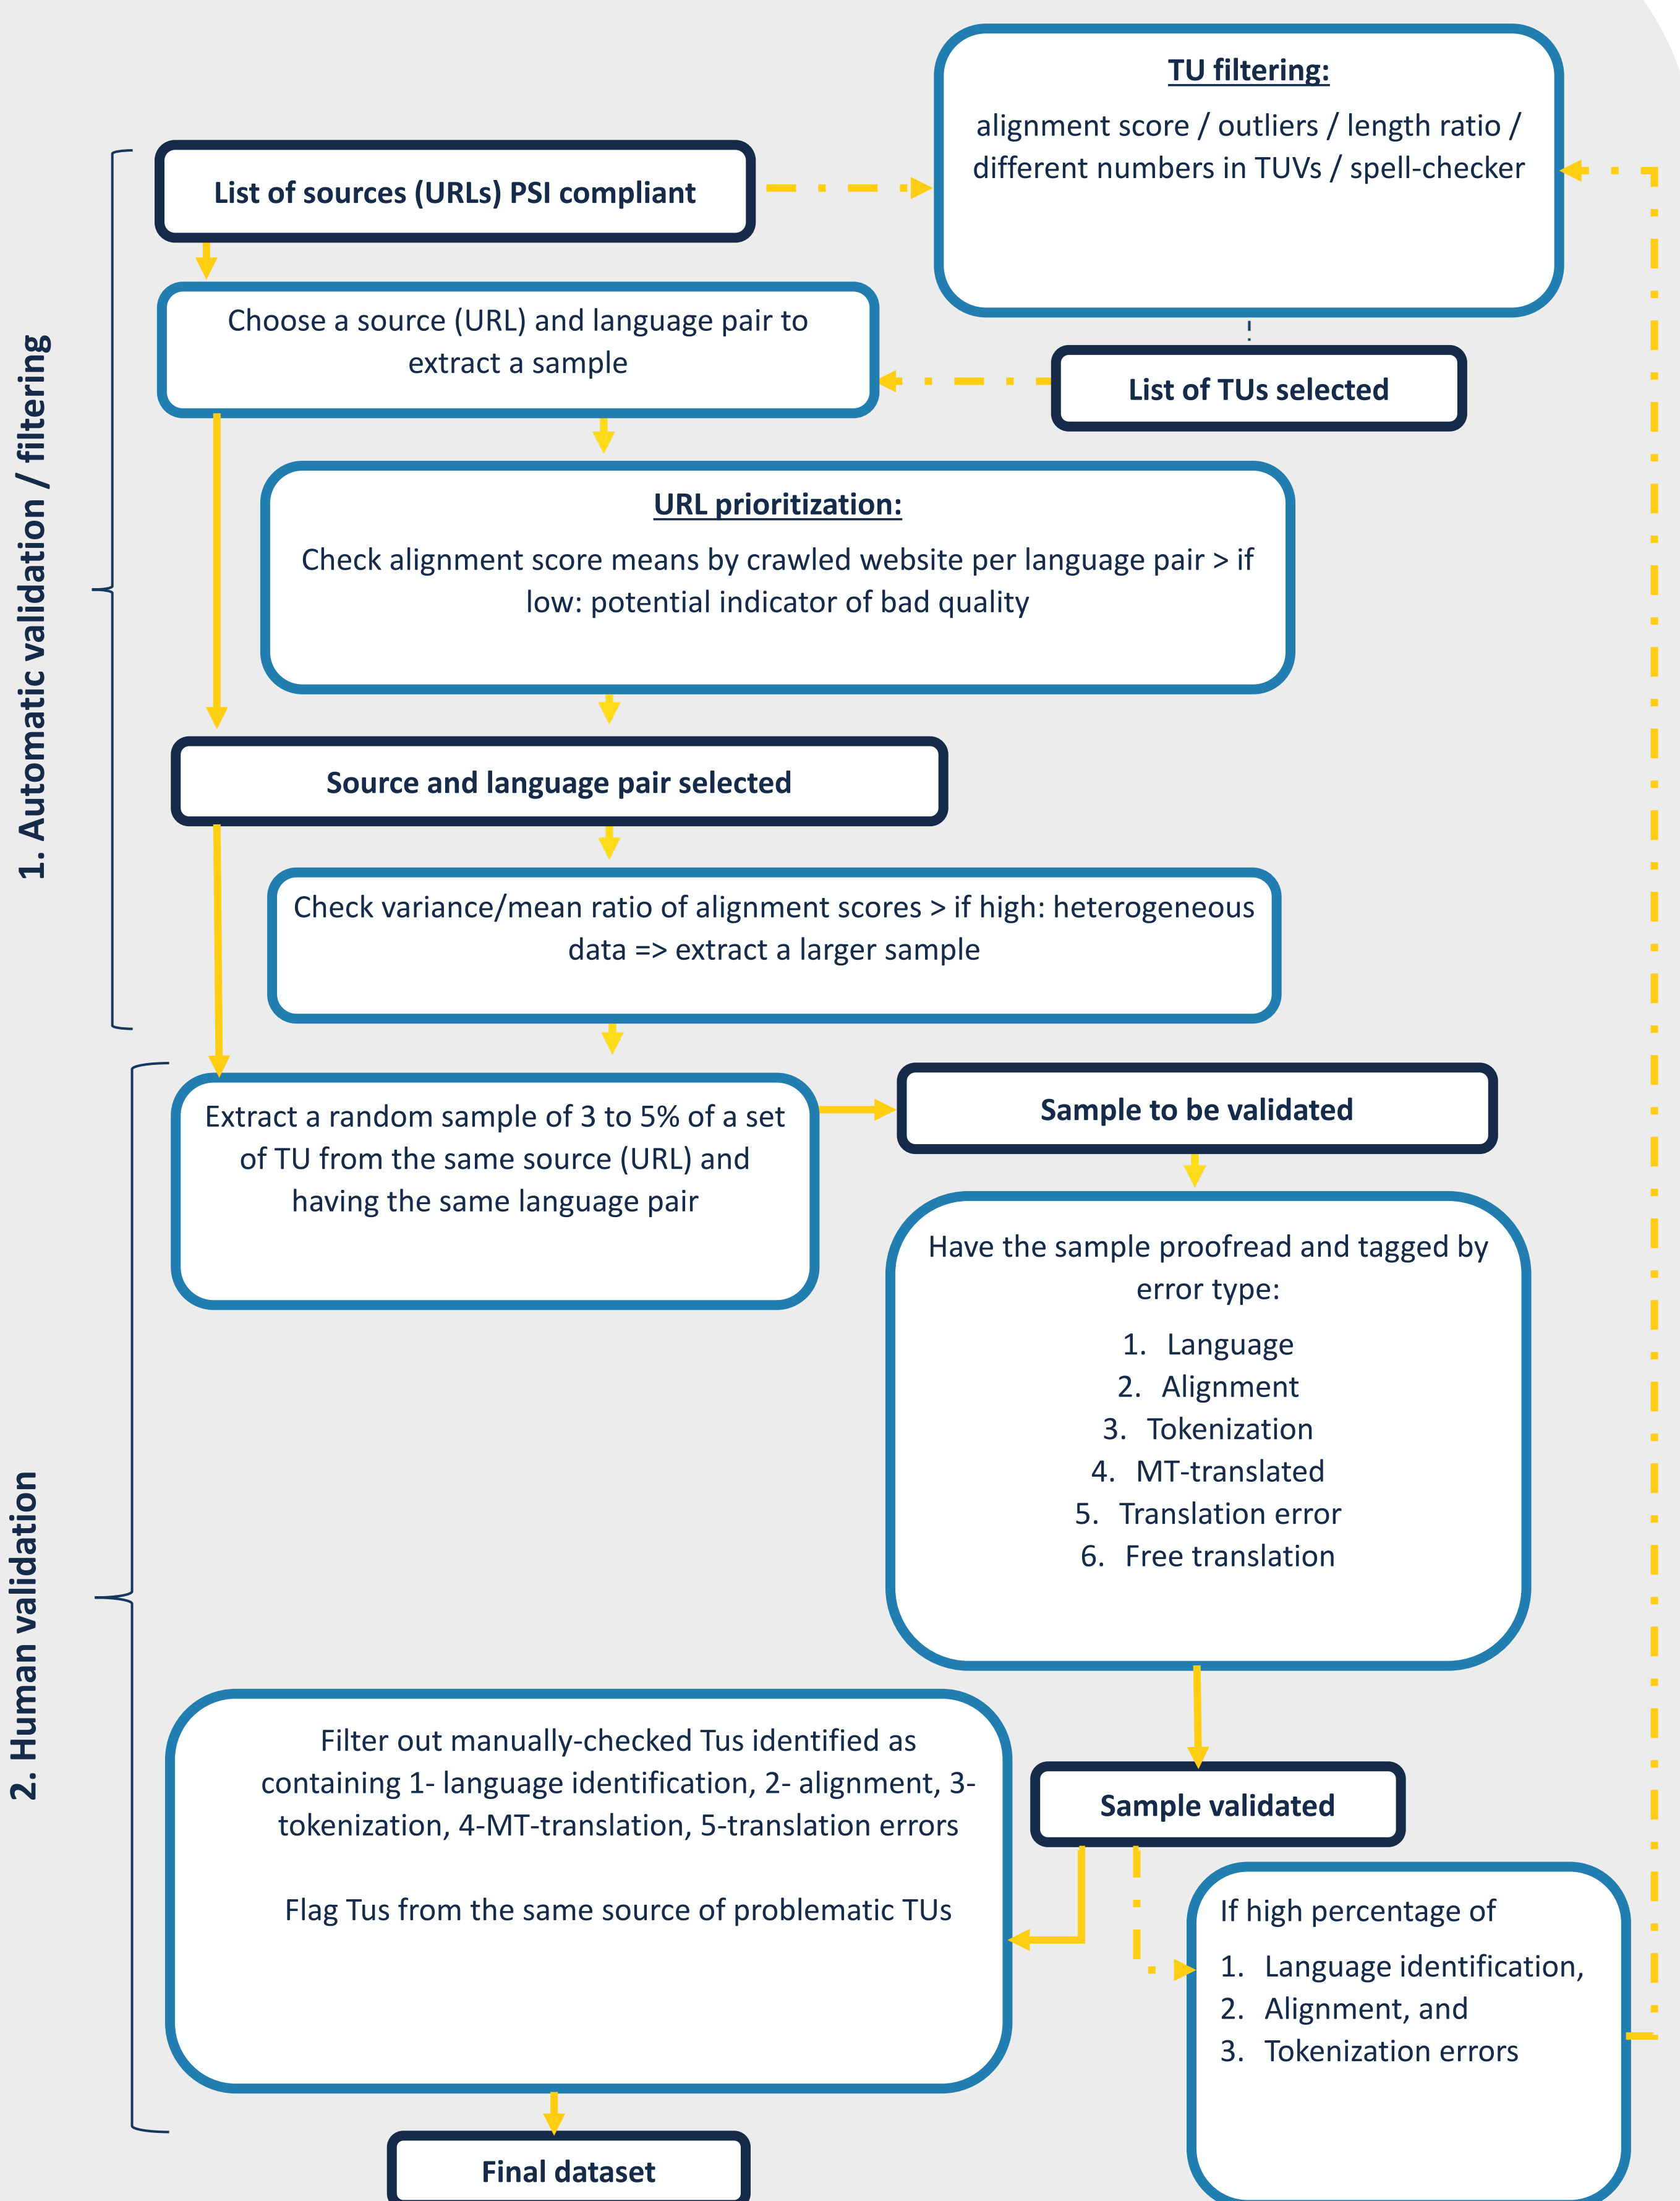

- Modified in 2013 by the Directive 2013/37/EU
- Replaced by the Open Data Directive 2019/1024 in 2019 (to be implemented by July 2021): Update of the existing rules governing the re-use of PSI held by EU public sector bodies at national, regional and local levels. It also determines the re-use of documents held by public undertakings, i.e. organisations funded mostly by or under the control of public authorities.
- Focuses on the economic potential of the re-use of information and encourages EU Member States to make as much data available for re-use as possible. → All public sector content (with some caveats) that can be accessed under national access to information rules is in principle freely available for re-use.

### 2. Sharing Language Resources within ELRC

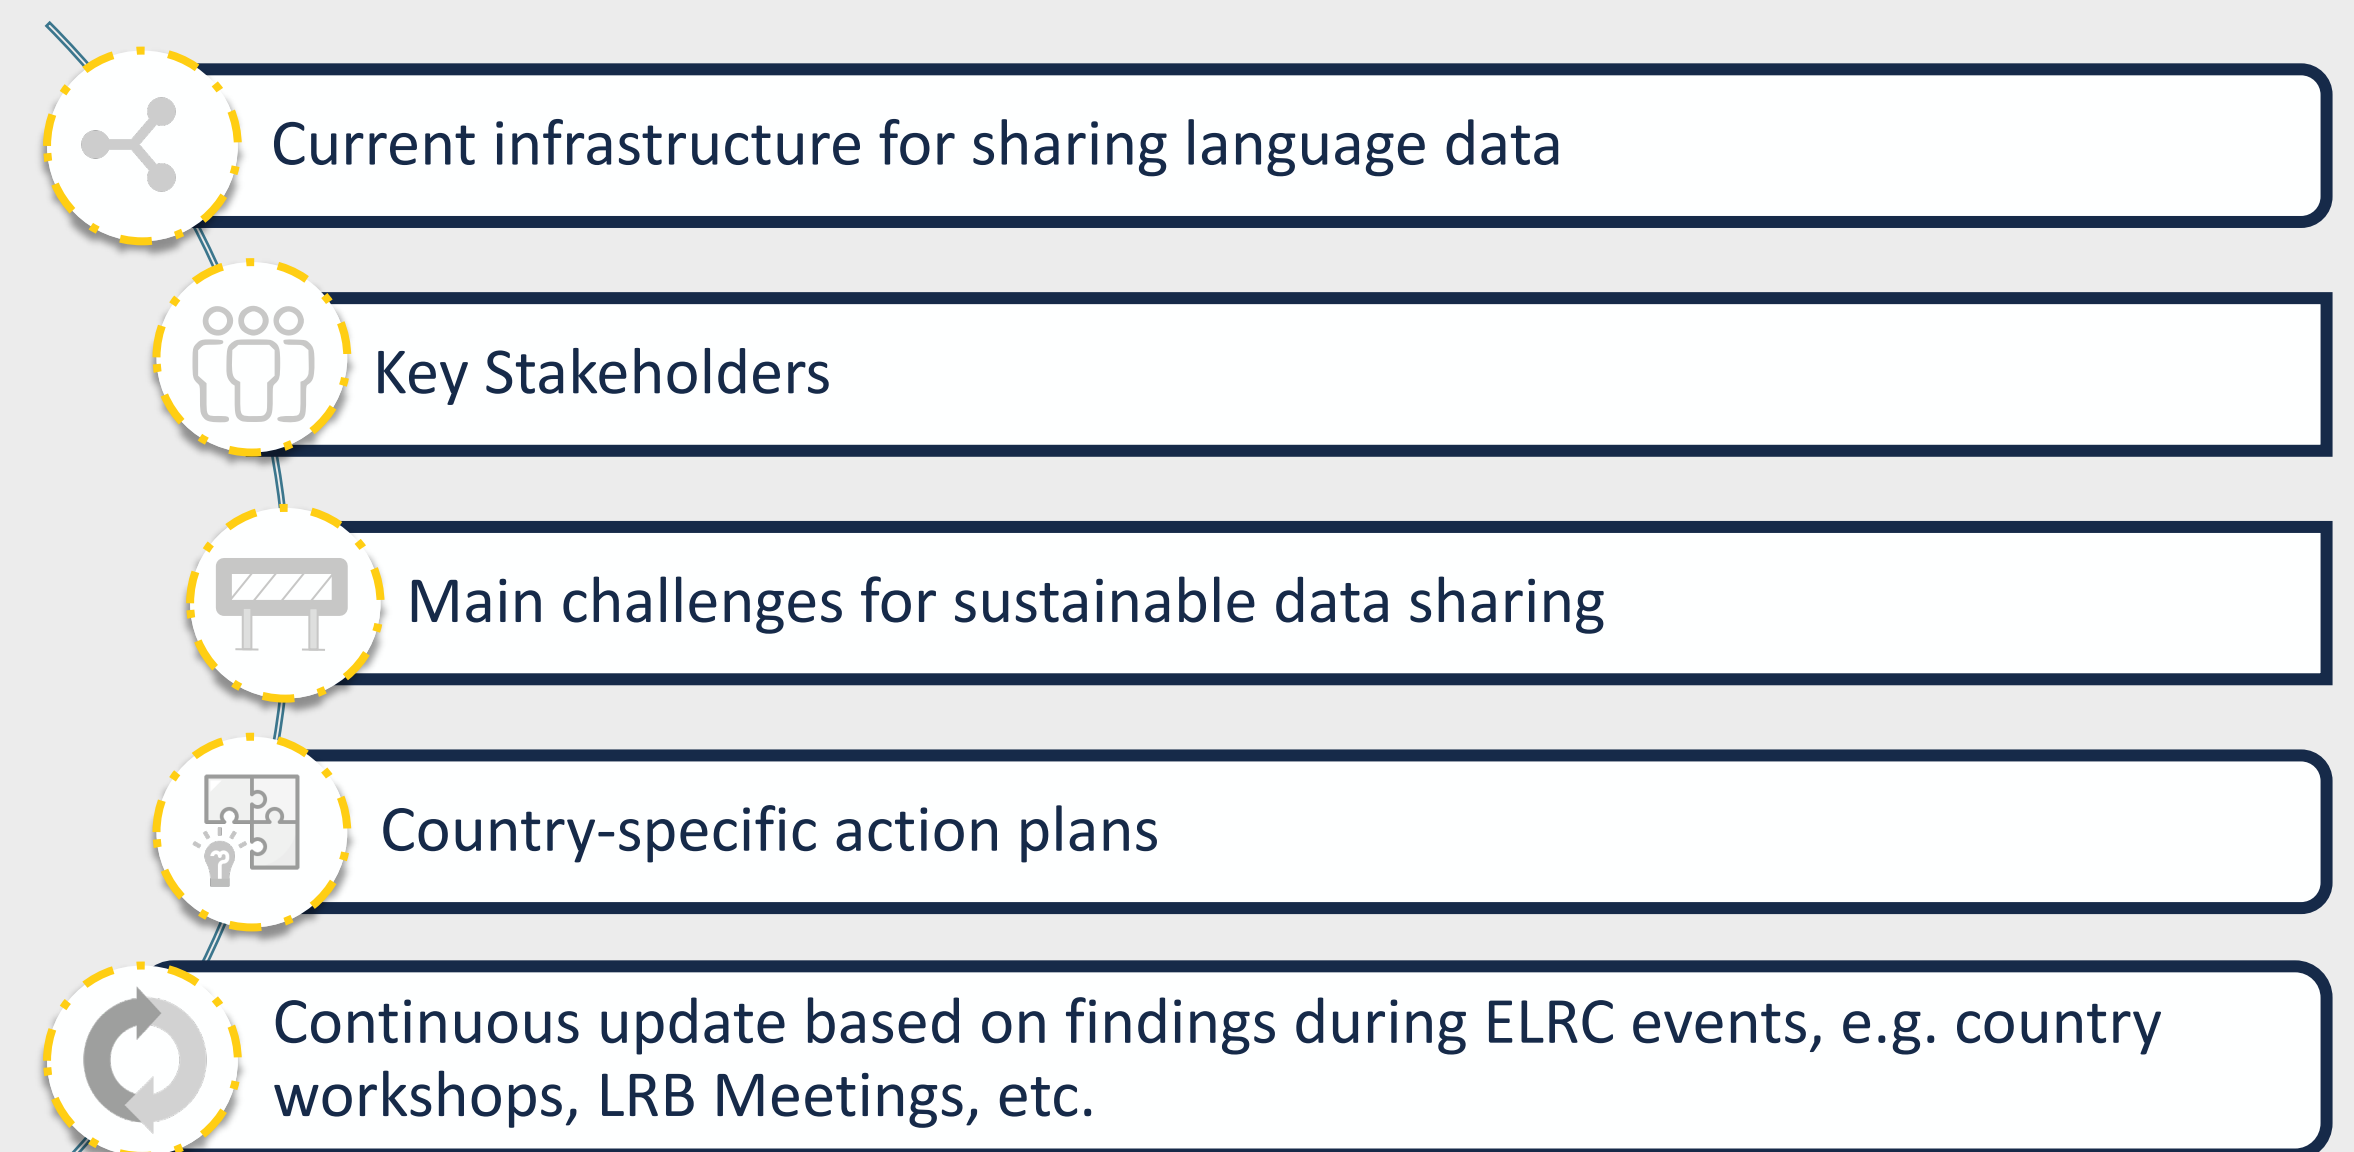

Support services to facilitate the sharing of LR
File Format Conversion
UTF-8 Conversion
Language Identification
Deduplication
Document Pairing
Parallel Corpus Generation

### 3. Validation of Language Resources

### 4. Country Profiles

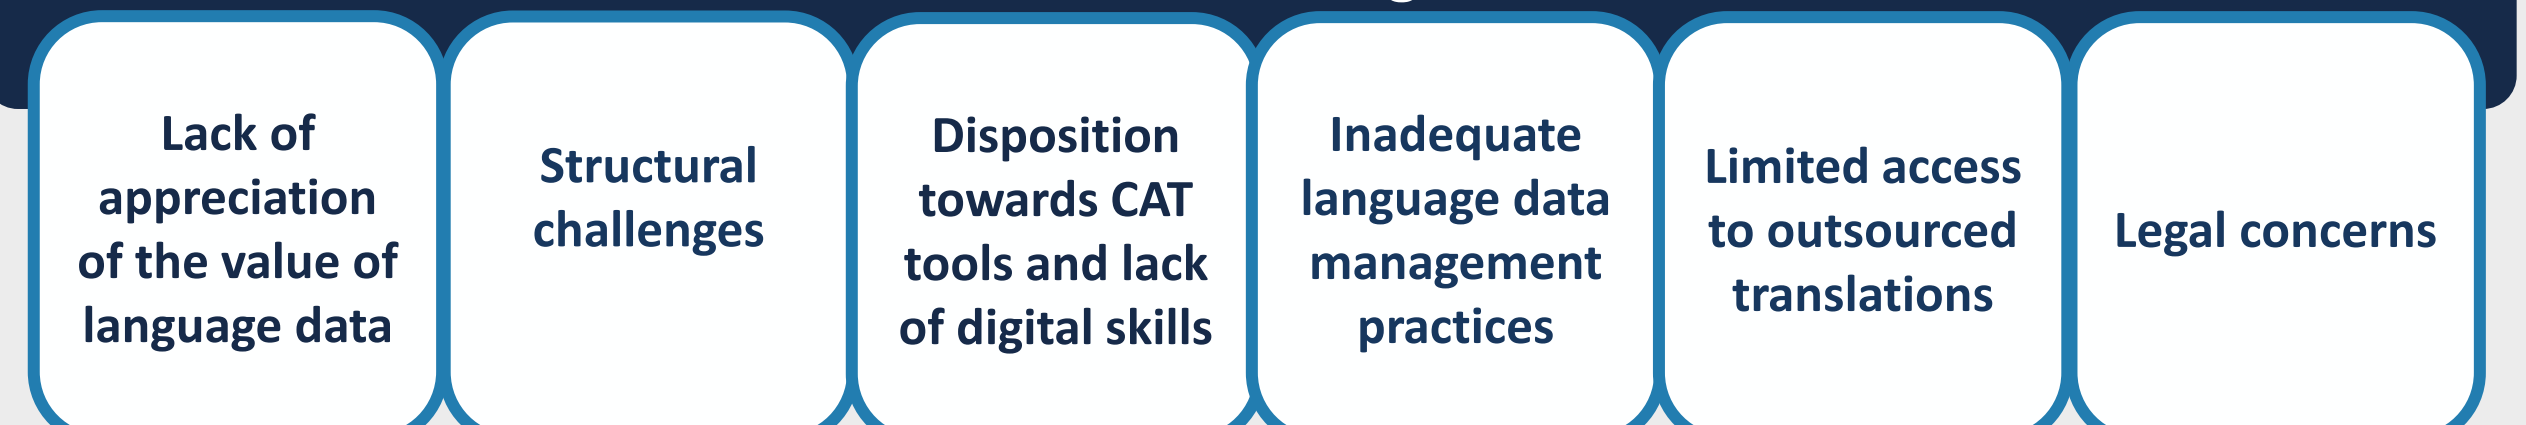

#### Europe-wide study on the infrastructures for sharing language resources in the Member States

#### Key Results

Translation practices, language data sharing infrastructures and processes vary greatly across the CEF countries.

#### Main Challenges

#### Recommendations
