Open Source European Language Models ("GPT-EU" from EU for all languages) would be a huge scientific and industrial break trough for Europe. (OR hardware support for ML in exchange for free license)

Language data sets (voice&text), different usage channels (chat, dialogue, mail), annotated data sets (syntactic structures)

Support the scientific and academic world with our NLG technology (e.g. corpus generation, generation of training sets, etc.)
The European Language Grid has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement № 825627 (ELG).

Thank you!
